

Level 7

QUIZ SECTION

In the following exercises, please describe the pattern of ST-segment changes (e.g., horizontal, descending, etc.) as well as T-wave changes (e.g., symmetric, asymmetric, biphasic, etc.) and decide what the underlying diagnosis could be.

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Negative-positive biphasic	Complete left bundle branch
Ascending	Asymmetrically negative	Complete right bundle branch
None	Symmetrically negative	WPW syndrome
	Positive-negative biphasic	Coronary ST depression
	None	Coronary T-wave inversion

ECG 2

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Asymmetrically negative	Complete left bundle branch
Ascending	Symmetrically negative	Complete right bundle branch
None	Positive-negative biphasic	WPW syndrome
	None	Coronary ST depression
		Coronary T-wave inversion

ECG 3

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Asymmetrically negative	Complete left bundle branch
Ascending	Symmetrically negative	Complete right bundle branch
None	Positive-negative biphasic	WPW syndrome
	None	Coronary ST depression
		Coronary T-wave inversion

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Asymmetrically negative	Complete left bundle branch
Ascending	Symmetrically negative	Complete right bundle branch
None	Positive-negative biphasic	WPW syndrome
	None	Coronary ST depression
		Coronary T-wave inversion

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Asymmetrically negative	Complete left bundle branch
Ascending	Symmetrically negative	Complete right bundle branch
None	Positive-negative biphasic	WPW syndrome
	None	Coronary ST depression
		Coronary T-wave inversion

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Asymmetrically negative	Complete left bundle branch
Ascending	Symmetrically negative	Complete right bundle branch
None	Positive-negative biphasic	WPW syndrome
	None	Coronary ST depression
		Coronary T-wave inversion

ST depression	T negativity	Diagnosis
Descending	Flat	Left ventricular hypertrophy
Sagging or U-shaped	Negative-positive biphasic	Right ventricular hypertrophy
Horizontal	Asymmetrically negative	Complete left bundle branch
Ascending	Symmetrically negative	Complete right bundle branch
None	Positive-negative biphasic	WPW syndrome
	None	Coronary ST depression
		Coronary T-wave inversion
